

Ponheary Ly Foundation (PLF)

Provide Unlimited Clean Water for 800 Children: \$1,420

Provide unlimited clean water for more than 800 children for a year: \$1,420

PLF has water towers set up at four rural locations to provide clean drinking water to over 800 children and their communities. We use ceramic filters to filter the water, eliminating organic contaminants such as viruses, parasites and e-coli, all commonly found in rural water sources. The filters cost \$22 each and every year we use 40 of them. It also costs \$15/month at three of the locations for fuel to run water pumps.
